It is with proper pride that we dedicate this book to the often-unsung U.S. intelligence and law enforcement officers who have so often, so obscurely, died or languished in undeserved imprisonment in the silent war of the United States against the British monarchy's illegal drug traffic into our nation.

This book is published with special thanks to those intelligence and law enforcement officials who have given us such extraordinary assistance in cross-checking facts in putting the story together. These have included officials not only in the USA, but our nation's French ally, **and also patriots in Canada embittered against what the Bronfmans and others have done to their nation and our own.**

It is no exaggeration to sum up the situation thus: the only proper comparison for today's British drug traffic into the USA is the British monarchy's 19th century Opium Wars against China. There is more than a parallel. The same HongShang and other banking interests that developed their wealth in the China opium trade are involved in the financial side of the traffic against the USA — **aided by those leading elements of the Zionist Lobby which have controlled organized crime in the USA and the Caribbean since the early 1920s.**

This is a calculated form of political warfare against the USA by the British monarchy. Not only are the London-centered Canadian, Hong Kong, Singapore, and British West Indies financial in-

terests involved in pulling tens of billions out of the USA — our biggest source of balance-of-payments losses — but this is a pre-calculated political warfare. The evil British intelligence executive — and head of the Aristotle Society — Bertrand Russell proposed this use of drugs as political subversion back during the 1920s. Among Russell's most prominent collaborators in this effort was Aldous Huxley, coordinator of the 1960s introduction of psychedelic substances to U.S. youth.

The fight against illegal drugs and against the evil forces of "decriminalization" is nothing less than a war against Britain, to the purpose of saving our youth and our nation from the destruction the British monarchy has projected for us.
